ORION'S BELT
ENGINEERING

Orion's Belt Engineering helps customer programs get or stay on track. We excel at driving efficiencies, minimizing costs, and delivering projects on-time and on-budget. Our ERP Project Management team offers proven support for project management across multi-organizational multi-disciplined geographically diverse teams.

Kari S. Sanders

- Project Manager – Maxar's ERP effort for implementing SAP S/4 Hana, Solumina, and Zflow
- More than 20 years of project management for complex technical projects in aerospace and defense

Robert Jeske

- Full ERP lifecycle including project management, data architecture, implementations, integrations, and upgrades for products including SAP S/4 Hana, SAP ECC, Oracle Netsuites, and Microsoft Dynamics.
- Business liaison between system developers and end users, assisting in system configuration and optimization, implementing automation as a cost reduction strategy.
- Supply Chain optimization and automation using Six Sigma Lean approach.

Austin Tanner

- More than 10 years of experience leading ERP implementation and upgrade projects for F500 and large public sector clients.
- Proven track record in rapid remediation and efficient system transitions, specializing in Oracle Fusion Cloud and SAP S/4HANA.

SBA Certification:

Woman-Owned Small Business (WOSB)

Cage Code: 8GZV8

UEI: MMEBEM6B7E49

Customer feedback:

- "For the various engagements I have had with this company, I have nothing but good experience. They stood out in every category and have been very impressed with their customer service, attention to detail, demonstrated knowledge and execution over a range of company efforts."
- "Kari came in during a time of transition and challenge. She helped guide the team on building an integrated schedule...Her knowledge of the material was deep and broad. Her communications to me on what was needed and what was realistic were both helpful and timely."

Projects:

- Project Manager – ERP effort for implementing SAP S/4 Hana, Solumina, and Zflow
- Project Manager supporting the implementation of and staff training for Enterprise PM software from Australia for a Canadian customer
- Project Manager for mobile application development
- Support to Program Management Office Process development
- Systems Engineering support for space applications
- Management Training Workshops and Classes on Project Management, Risk Management, and Fostering Creativity

CONSULTANT PROFILE: KARI SANDERS

Experience

- Over 25 years of experience, spanning the project lifecycle from business capture to operations on ERP systems and other complex technical systems from optical payload and spacecraft development to ground systems, algorithm development, and data dissemination.
- CP, CPAF, CPAF/IF, FFP, and T&M contracts ranging in value from \$250k to > \$800M.

Projects

Systems engineering in support of the Critical Design Review for iSpace's NASA CLPS lunar lander.

Project Manager supporting the implementation of Enterprise Project Management software for a Canadian customer. Effort included helping to plan change management, conducting training of customer personnel, and supporting hypercare sessions

Project Manager: Rise Phase 2 – implementation of SAP S/4 Hana, Solumina, and Z-flow for Maxar Space. This was a multi-year multi-phase effort where focus was on PM metrics as well as assisting with strategic planning as the business case shifted.

EVMS-Lite Initiative: The objective was to train staff on EVMS methods on a commercial project in such a way that it did not increase the management costs of the project. Implemented the QBD method I have successfully used in Agilefall, including the CPI, SPI, and TCPI metrics. The initiative was later rolled out to additional projects.

CASFAR Initiative: Drafted the EVMS System Description Document for Maxar, adjudicated the results of internal reviews, ensured it was released, and provided training to selected teams on the contents.

Systems engineering support for SpaceForce/AFRL design review comment adjudication. PMO support for implementing Agile, developing IMS templates, mentoring junior project managers.

Program Manager for >\$400M Spacecraft Program:

I was part of this program for 4 years, starting after CDR as a Systems Engineer, then as a Deputy Program Manager, then the Program Manager. The program had a successful (early!) delivery earning 100% award fee and a "Far Exceeds Expectations" rating on delivery incentive. When the company won a new project a month before the delivery, there was a substantial transfer of our staff to the new program, necessitating in my leadership to both train existing personnel in new roles and to negotiate a reduced scope of post-delivery support work with the customer to align with the reduced staffing profile. Post-delivery support was successful.

CONSULTANT PROFILE: ROBERT JESKE

Experience

- Full ERP lifecycle including project management, data architecture, implementations, integrations, and upgrades for products including SAP S/4 Hana, SAP ECC, Oracle Netsuites, and Microsoft Dynamics.
- Business liaison between system developers and end users, assisting in system configuration and optimization, implementing automation as a cost reduction strategy.
- Digital Transformation through the integration of Engineering, Operational and Business Systems, creating a digital thread utilizing a data warehouse, data lake or data mesh.
- IT Vulnerability and Cybersecurity program management, ensuring NIST 800-171, ITIL or CIS framework compliance for both on-premise and cloud environments.
- Supply Chain optimization and automation using Six Sigma Lean approach.
- Assist CIO with Architectural Roadmap enabling automation, optimization, cloud computing, and data storage.

Projects

Program management of SAP S/4 Hana Implementation, integrating the company's existing manufacturing and inventory systems into the Company's ERP system. Historical data was cleansed and reconciled for conversion into the newly implemented ERP system.

Program management of an SAP S/4 Hana implementation, converting Oracle Financials and SAP ECC data, and integrating the Company's existing manufacturing and Workday HRIS systems. Worked as a liaison between the end system users and ERP developers to establish process and configuration for accounting, procurement, inventory management, asset management, and time keeping. Established DCAA / DCMA system compliance for time keeping, Materials Management and Accounting Systems (MMAS), and the Accounting System.

Program management of an Oracle NetSuites implementation, including financials, MRP, inventory management and integration into supplier portals. Configuration lead, working with end users to determine process and system configuration. Worked with end users to develop implementation testing and data conversion strategy.

Implemented the SAP ECC ERP, integrating manufacturing (MES) and product planning management (PLM) systems. This included application rationalization of parent company systems to determine the final system architecture. Worked as an SME in the financial and cost module (FICO), establishing the process and configuration for project cost recognition and general ledger management. This project integrated all manufacturing, operations, and business systems to include supply chain, inventory management, manufacturing labor, and material costing.

CONSULTANT PROFILE: AUSTIN TANNER

Experience

- Accomplished Technical Project Manager and Senior Contracted Consultant to Gartner with over ten years of experience leading ERP implementation and upgrade projects for F500 and large public sector clients.
- Adept at ensuring seamless collaboration between technical and functional stakeholders, managing complex technical environments, and delivering successful project outcomes.
- Proven track record in rapid remediation and efficient system transitions, specializing in Oracle Fusion Cloud and SAP S/4HANA.
- Certification: Oracle Cloud Infrastructure, Associate

Projects

ORACLE

FUSION APPLICATIONS

Technical Project Manager and ERP QA Advisory for Oracle Fusion Cloud Implementation for Education

Engagement: Implemented Oracle Fusion Cloud ERP (HCM & Financials) for a large public sector client as part of a rapid remediation team after three failed Go Lives.

Ensured seamless collaboration between technical and functional stakeholders. Led the TIGER Team on remediation of high-impact project issues. Analyzed business requirements and managed environment plans. Oversaw data extraction, integration development, reporting, and cutover support. Managed Oracle vendor relationships and provided post-go-live support.

Result: Achieved a successful implementation marked by a smooth Go Live. Delivered effective Hypercare post-implementation.

Project Management for SAP ECC6 To S/4HANA Upgrade & Corporate Accounting Transformation for F500 CPG Client

Engagement: Upgraded SAP ECC6 to S/4HANA, acting as interim plant controller. (Consumer goods)

Led the Stuarts Draft Plant for The Hershey Company's transition from ECC6 to S/4HANA. Ensured a seamless upgrade process and facilitated a successful go-live on April 1st. Enhanced financial controls, refined operational processes, and optimized reporting on SAC.

Result: Successfully closed Mar-24 in ECC6. Seamless cutover to S/4HANA on April 1st, 2024.
